Nava, Coahuila, Mexico

Certification level

Gold

Percent of Overall Diversion Achieved

98.5%

Facility Size

10,602,451.35 ft²

Type of Operation

Brewery

Project Owner

Constellation Brands

Project Overview

The implementation of TRUE certification in our facilities encourages us to continue implementing strategies to improve the way we manage our waste and reduce our environmental impact. • We achieved a 98.5% diversion rate. • A new project was implemented for textile waste recycling, which used to be sent to landfills. • The initiative to reuse wooden pallets and metal drums for transporting hazardous waste instead of buying new containers. • The reuse of computer equipment within the facilities and external donation. • Use of compost generated at the plant for green areas, nursery and food production. “At Constellation Brands we promote actions that foster a culture of continuous improvement to achieve a performance of environmental excellence and reduce our impact on waste, based on the guidelines of our breweries and the TRUE standard,” said Director Senior EHS & BCP, México.
