Distribution Center
Project Overview

At Cintas, honesty and integrity are at the root of the decisions the company makes, the products and services they provide and the way they help customers get Ready for the Workday. These traits are directly linked with their ongoing commitment to corporate responsibility. They're unified as a company in being world class in safety, providing sustainable products and services, maintaining a diverse and inclusive workplace and caring for the communities in which we do business.

Cintas' journey of Zero Waste to Landfill at their Distribution Centers is ongoing and they hope to expand to Rental Plants and manufacturing locations in the future. Cintas is committed to improving the lives of our customers, partners and communities by integrating environmentally sustainable practices, principles and solutions across our business lines.

> "This recognition for the Reno DC represents another big step in our corporate zero-waste-to-landfill journey. From reusing packing materials to being more conscious about materials that can be recycled, the Reno team has made a concerted effort to review its waste strategy and make improvements wherever possible. We look forward to replicating the facility's innovative strategies in other Cintas distribution centers."
