

Colgate-Palmolive Jaguare Plant

Location

São Paulo, Brazil

Certification level

Platinum

Percent of Overall Diversion Achieved

93.85%

Facility Size

32,198 m. sq.

Project Owner

Colgate-Palmolive

Project Overview

Colgate-Palmolive's Sustainability & Social Impact Strategy stems from our purpose: "We are Colgate, a caring, innovative growth company reimagining a healthier future for people, their pets and our planet." The Jaguaré plant is aligned with our corporate responsibility and sustainability initiatives as part of a long term business strategy. At the Colgate-Palmolive Jaguaré plant, we are committed to reducing our impact on the environment. Jaguaré site is committed to reducing waste at the source in the production process, focusing on reusing and recycling to the maximum possible extent. Our leadership team is committed to our TRUE certification for zero waste. All the employees and site contractors received zero waste training and updates on goals and new best practices. "Trash to treasure" is an event that engages employees to inspect all waste streams to generate reduction ideas. Some of the site's zero waste highlights include; a program to collect and divert waste as food scraps to compost, reuse of pallets, wastewater sludge to be fertilizer, working closely with stakeholders to reduce inbound packaging waste, and a high level of engagement from site leadership. Practices such as these divert waste from landfill and incineration, reduce costs, and reinforce a culture of zero waste and sustainability. "By 2025, we aim to achieve 100% TRUE certification for our global operations, including manufacturing sites, technology centers, strategic offices and owned warehouses," says Ann Tracy, Chief Sustainability Officer. "With enthusiastic teams, collaborative partners and this comprehensive approach to waste reduction, we're confident we can make it happen." Learn more about [Colgate's sustainability efforts](#).
