Gold
Percent of Overall Diversion Achieved
97.4%
Facility Size
96,000 sq ft
Project Overview
Designed, made, and based in Duluth, Minnesota, Loll Designs – a Landscape Forms company - creates durable, all-weather, and 100% recyclable outdoor solutions for residential and commercial applications. Founded on principles of thoughtful design, the responsible use/reuse of recycled materials, and a deep appreciation for the environment, Loll embodies what it means to be a sustainable product and company. As a proud member of 1% for the Planet and a Cradle-to-Cradle certified company, Loll prioritizes a “people and nature first” approach to business. Loll Designs strives towards eliminating waste in operations and product offering. Loll is committed to reducing waste generation; promoting responsible waste management with suppliers, customers and community; and increasing overall diversion by 1% annually until arriving at 100% diversion from landfill. Building on Loll’s long-time commitment to reducing waste, True Certification validates all the myriad efforts made to date, while also providing the framework to take the initiatives even further. "This TRUE Gold achievement is a proud moment, as it recognizes all the ways Loll’s endeavors in zero waste contribute to the circular economy and a sustainable future," said Eric Swanson, Loll President. Learn more in the TRUE project case study, and find additionall information on Loll Designs' sustainability efforts on their website.
